

Power BI

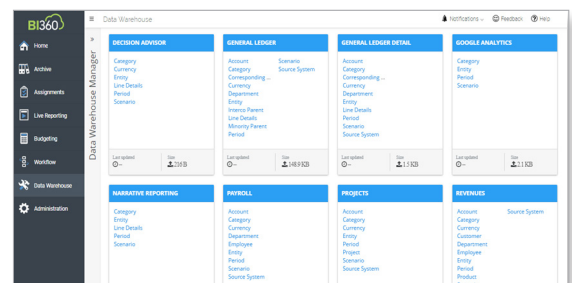

THE BEST OF BOTH WORLDS

HOW BI360 CAN HELP YOU

BI360 makes it faster and easier to deploy and maintain your Power BI dashboards. As a leading corporate performance management (CPM) solution, BI360 provides a user-friendly, pre-configured cloud data warehouse that has numerous data connectors for both cloud and on-premise data sources. By connecting BI360 and Power BI, you can reduce the time to deploy Power BI from weeks or months to just days!

In addition to its value as a data warehouse for Power BI, Solver's BI360 solution has a powerful Excel report designer add-in that compliments Power BI dashboards by adding leading financial reporting, consolidations, budgeting and forecasting functionality. All of it is running in the Microsoft Azure cloud with a user-friendly web portal interface.

Combine multiple data sources by using BI360's data warehouse to feed information into Power BI using the BI360 Connector.

Typical Power BI Customer Needs

Lower cost and time to deploy Power BI	✓
Less technical skills required to deploy and maintain integrations and data for Power BI	✓
Simplify Power BI deployment with a pre-configured, cloud data warehouse	✓
