## HT-HD01 – Support Level

This report monitors the incoming calls received by a support help desk. It tracks total incoming calls, total abandoned calls, total answered calls, total real calls and total spam calls. This report compares the current period to the prior period. It also breaks out the support calls by region, company type and company.

## HT-HD02 – Service Level

This report compares the service level an agent provides by monitoring the number of incoming calls, calls answered within 30 seconds and calls answered after 30 seconds. A % of calls answered in 30 seconds calculation is used to determine whether or not the service level is good, medium or bad for each agent, company and region.
